

steps mentioned earlier to install and apply those widgets to your home screen.

Here are some of the sample home screen setups that we made using this pack.

4. Win 11 Widgets - Winify KWGT

This pack is from the developer of the KWGT app itself and it really does show in the widgets that it offers. If you're a

Windows fanboy and if you liked the recent Windows 11 update then you're gonna love this one.

This widget pack offers Windows 11 themed widgets for your home screen and trust us, they look awesome! The developer has nailed everything, from the fonts to the scaling and the design of the widgets to make them look like you directly imported them from your Windows devices.
