

If you swipe up from anywhere, you'll get your app drawer.

If you swipe down from anywhere, you'll launch a global search. This bar will search for apps on your smartphone and the web for the search string typed.

Lastly, our favourite feature of this Launcher, is if you swipe right, you will see a “Glance” and “News” menu. Here, you'll see widgets for Calendar, Sticky Notes, To-Do list, etc. In the initial setup, if you have logged in with your Microsoft Account, then all of your events, tasks and to-do lists will automatically get synced here.

If you tap on the little “News” icon on the bottom, you'll see the latest news on various topics.

In our opinion, we don't like the app drawer. We think it's cluttered and well, just not organised properly but everything else like the global search and the cards menu is pretty good.

Now that we're done with the basic overview of the launcher, let's get customising! First, tap and hold anywhere on your home screen to bring a menu up and tap on “Launcher Settings”.

Here, you can change each and every little thing about the launcher. From
