

If you're using Lawnchair, long press anywhere on the home screen to bring up a menu. Then click on "Home Settings". The settings should be in front of you right now.

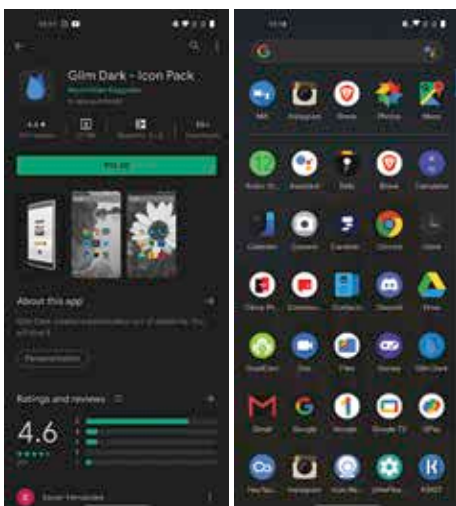

Now, tap on the first menu - "Theme". You'll see the option for "Icon Packs" at the top.

Tap on it to go to a sub-menu where all of the installed icon packs will be listed.

Glim Dark Icon Pack

Glim Dark is one of our favourites. We've been using the icon pack since the start of our customisation journey and this icon pack has always been the one to fall back to if any of the other icon packs didn't look as good. The reason? Well, because this icon pack has material, dark-themed and minimal icons for almost every app that you can imagine while having different variations for some apps too.

Once you've installed the app from the Google Play Store, apply the icon pack to your Launcher. We've just covered the procedure in the above paragraph. After you're done with that, make sure that "Dark Mode" in your Launcher is enabled. This will make all the context menus, widgets and most importantly - the app drawer dark. Now, go to your home screen and open up the app drawer.

You may notice that the

icons for some of the apps have not changed. Well, this is because this app is old. We mean, very old. The app was last updated in 2017 and hence it does not support some of the newly released apps. Nonetheless, we've included this pack in this list due to the sheer number of icons and the quality of icons available.

Say you don't like the icon of Instagram. You can change it easily and
