

Glim Dark has a lot of variations for Instagram too. Open your app drawer, long press on the Instagram icon and tap on this “pen” icon.

Then, tap on the Instagram icon and you should see this screen.

This is a list of all the currently installed icon packs on your device. Since only Glim Dark is installed right now, only that will show up. Tap on the “Glim Dark” option and

it’ll bring up a menu of all the icons that Glim Dark has to offer. These icons are alphabetically sorted and since we need Instagram, we’ll scroll right to the “I” section. Here, you’ll be able to see all the different icons available for Instagram. You can choose whichever icon you want from here.

Simply tap on the icon of your choice and it’ll be applied.

It’s important to note here that the above procedure is not exclusively
