

for the Glim Dark icon pack. You can follow this procedure to change the icons on a per-app basis using any icon pack.

On the previous page are some of the icons from the icon pack.

Ombre Icon Pack

Okay, maybe you don't want an old icon pack that was updated in 2017. You want something modern but something that should still complement the dark theme of your phone.

Well, look no more because we think that Ombre Icon Pack is the perfect replacement for Glim Dark.

Ombre Icon Pack is going for the “dock” aesthetic that not many have tried in this market. If you look carefully, beneath every icon, there is a small dock. We think that this makes it stand out from the other “dark and minimal” icon packs out there. It brings something new to the table and with its matching gradients and a vibrant colour palette, we think that the Ombre Icon Pack is a must-try.

The best thing that we liked about this icon pack is that even if it does not have the icon for a certain app, it still applies the “dock” to it so that no icon would stand out from the crowd and everything would look in place. This is a very clever idea to mask
