

the un-supported icons. Here are some of the icons from the icon pack.

The only downside to this icon pack is the lack of variation in icons for certain apps. We're getting a little bit nitpicky here but aside from the major Google apps, Ombre has little to no different icons for non-Google apps.

Lines

We've had enough of "dark and minimal" icon packs now. Let's explore the wilderness for something better. Lines is a unique icon pack that offers all the icons in only one colour - White. That too, without any filling. That's right, there's a reason why this icon pack is named "Lines" because all the icons are just "Outlines" of their icons.

Download and install the app from the Google Play Store and apply the icon pack in your launcher. After you open up the app drawer, you should see something like this:

You'll immediately notice two things. Firstly, in our opinion, this icon pack looks fantastic. The white, minimal outlines of the app icons look really beautiful. Secondly, not a lot of apps are supported. You see, to increase the app support, you will need to buy the pro version of the app. The pro version will give you 1000+ more
