

that makes the app's features easy to comprehend. This is a must-have app for power users and productivity freaks and is worth the price tag it asks for.

Power Menu Controls

When Android 11 was launched, Google revamped the entire power menu. All of the critical controls, such as Power Off, Restart, and Emergency mode, were moved to the top section, freeing up room in the remainder of the area for Google Pay cards and smart home settings. However, the feature was virtually useless for users who lacked a home automation system. Power menu controls is an app that allows the users to customise the power menu to their own accord.

The user has to grant Accessibility permissions, permission to display over other apps, and modify system settings to use the application. Once permissions are given, the users can enable the features they desire and then press and hold the lock button to customise the power menu and set up the layout of these new controls.

Power menu adds a host of features and controls like Battery Saver, Alarm Volume, Bright-
