

Live Wallpapers

Make your background come to life

Phone wallpapers. Arguably one of the most seen parts of the phone in daily use, given how much everyone constantly returns to their home screen to change apps. Some spend a lot of time choosing the perfect wallpaper, others just leave it at the default one, and yet others keep changing it based on their mood. But what if we told you they didn't have to be just a nice looking static image? We bring to you some of the best live wallpaper apps, from simple GIFs to fancy interactive backgrounds.

Video/GIF Wallpapers

A pretty picture or a minimalist background can act as a nice wallpaper, but so can a subtle GIF or a slow-moving video. It can also be soothing and become something that helps you relax for a minute during a hectic day. In this section, we'll cover two apps that produce super soothing live wallpapers for any mood, comfort or taste.
