

To apply any premade theme, tap on the theme you like, you'll see a preview of it with a small download button on the bottom. Download that and when you come back to the “Theme It!” menu, you'll find the theme waiting for you in the list. We're using the “Cool” theme and here's what it looks like.

If you think that was it as far as customisation is concerned, boy! You're terribly wrong. Go to the Settings page again and you'll find an option to customise emojis. Yes! Emojis! Select any one emoji style from any of the listed, tap the black “Download Now” button and all the emojis inside the app will be changed to that style.

Another very nifty trick is to change the type of vibration that your phone will make whenever you receive a message. Yes, you can do that too. You can either change it on a per-chat basis or globally throughout the app. To change it on a per-chat basis, go to your desired chat and tap the three dots on the top right corner of the screen. There, tap on Notifications and then tap on Vibrate
