

for Updates” key, then right-click on the right panel and choose “New -> String Value” from the drop-down menu.

“Icon” is the new String value’s name.

To save the changes, double-click the value, enter the following path in the Value Data field, and then click the “OK” button.

```
%SystemRoot%\System32\shell32.dll,-47
```

That’s all you have to do. In the desktop context menu, immediately before the “Check for Updates” option, you’ll see a lovely icon.

Enable Dark Mode in Windows 10

One thing to bear in mind before continuing is that Dark Mode in Windows 10 is not yet complete. As a result, you may encounter discrepancies. Only follow the procedure if you are confident in your abilities.

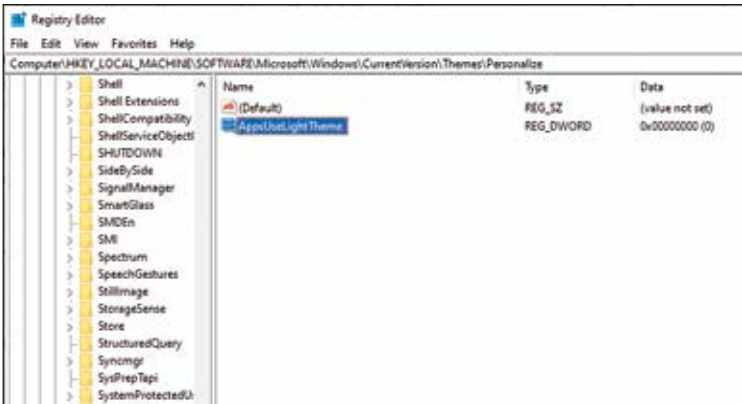

It’s simple to enable Dark Mode in Windows 10; all you have to do is create a few registry keys. To do so, press “Windows + R,” type regedit, and then hit the Enter key.

The Windows Registry will be opened as a result of the preceding action. Navigate to the next key from here.

```
HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Themes\
```

For the Themes key, we need to make a new sub key. To do so, right-click on “Themes” and choose “New” followed by “Key.”

Name the new key “Personalize” and confirm the name by pressing the Enter key.
