

Unlike some other free registry cleaners, no toolbars or other apps attempted to install.

Windows 10, Windows 8, Windows 7, Windows Vista, and Windows XP are all supported. However, the utility isn't compatible with anything older than Windows 7. The software has not been updated for a long time so we don't recommend using it on Windows 8, 8.1, 10 or 11. The developers of the software are currently maintaining jv16 PowerTools which is a more feature-rich application and it also supports Windows 11. So if you're still interested, then you might want to check that out.

EasyCleaner

EasyCleaner is another one of the more well-known and often recommended free registry cleaners available. The user interface is a little old, but it's a good registry cleaner.
