

- After this operation, 1132 MB of additional disk space will be used.
- Do you want to continue? [Y/n]

The entire package should be a little over 1 GB in size.

Just press enter to confirm. It may take a while. A progress bar must be shown at the bottom.

Once done, you should see the following packages installed:

- Setting up ros-melodic-nodelet-topic-tools (1.9.16-0bionic.20190601.015001) ...
- Setting up ros-melodic-nodelet-core (1.9.16-0bionic.20190601.015433) ...
- Setting up ros-melodic-roswtf (1.14.3-0bionic.20190601.014658) ...
- Setting up ros-melodic-ros-comm (1.14.3-0bionic.20190601.015500) ...
- Setting up ros-melodic-ros-core (1.4.1-0bionic.20190601.015718) ...
- Setting up ros-melodic-ros-base (1.4.1-0bionic.20190808.193524) ...
- Processing triggers for libgdk-pixbuf2.0-0:amd64 (2.36.11-2) ...
- Processing triggers for libc-bin (2.27-3ubuntu1) ...

And you must have a free terminal ready to use again:

- user@computer:~\$

ROS Dependencies

We are almost there! ROS commands Client can also manage dependencies for you and rosdep is the one in charge of it.

That's why we have to initialise rosdep. It goes like this:

- `sudo rosdep init`
- Wrote /etc/ros/rosdep/sources.list.d/20-default.list
- Recommended: please run
- `rosdep update`

Similarly to ubuntu repositories, you need to update rosdep sometimes:
