

“a new reality rules,” according to his definition. As a result, we’d have to retire our old models. According to him, as we grow closer to the moment, it will loom larger and larger over human events until the concept becomes widespread. The singularity, according to Vinge, will still be a major surprise and “a larger unknown” when it occurs. Vinge linked the singularity to the rise of artificial intelligence.

Indeed, he equated the emergence to the emergence of human existence on Earth.

The exact Singularity - When they start to think for themselves.

The Matrix shows a dystopian future

The impending production by artificial beings by beings with greater intelligence than humans, he claims, is the cause of the shift. Though the singularity is rarely discussed in mainstream media, it is frequently discussed in pop culture. Its appearance in the ‘Terminator’ film franchise is perhaps the most well-known. In the ‘Terminator world,’ robots have advanced to the point that they can wage war on humans. Further, in the ‘The Matrix’ franchise, the AI has become clever and has successfully trapped us all in virtual reality.

2100 - Doom of mankind?

Some analysts believe that the year 2100 will see artificial intelligence overtake human intelligence. Even among specialists, though, there does not appear to be agreement on the date. In his book ‘The Singularity is
