

They aren't lying

allow you to customise Windows 11 exactly how you want it. Remove bloatware, pre-installed apps, and manage other Windows 11 apps with Kickassbloat and Packages. You may also utilise PowerUI with PowerShell to automate tasks in Windows 11.

You can change a lot of things with ThisIsWin11, like getting rid of Microsoft OneDrive and Cortana for good. If you wish to give ThisIsWin11 a shot, you can get it for free from the Github repository.
