

Looks cool!

Lively Wallpaper

Windows 11 offers some really interesting wallpapers, but they can get a little boring after a while. If you want your desktop to have a little more personality, we recommend buying Lively Wallpaper. It may be downloaded for free from the Microsoft Store.

Lively Wallpaper isn't your typical wallpaper software. It's one-of-a-kind, allowing Windows 11 users to set videos, webpages, and GIFs as their desktop backgrounds. You may also add animated backgrounds to your desktop to improve the overall look and feel. Furthermore, after you've found a background you like, you can customise it to fit your style. In only a few clicks, you may change the brightness, speed, zoom, overlay colour, and more.

WinAero Tweaker

Winaero Tweaker is a popular modification application that works with all Windows versions and is available for free.

Using this, you can alter the secret settings that Microsoft won't allow you adjust through the user interface with Winaero Tweaker. For example, you can enable the classic context menu and add specific options to it, among other things. With Winaero Tweaker, you may also customise Aero Colors, Aero Lite, dark colour schemes, the colour of inactive title bars, and animation effects.
