

Internet Browsers

rekonq

Rekonq was one of the browsers that replaced Kubuntu's default browser, – Konqueror – one of the longtime KDE favourites. The interface of Rekonq is similar to Chrome and other common web browsers so the Web kit layout engine is laid at its core. The Web kit is actually derived from KHTML, the layout engine of Konqueror.

Why you must get it:

One of the major features of this web browser is the KDE integration. Most of the famous web browsers are integrated with Gnome's file picker thus making them slightly boring and lacking. KDE lets the user have the ability to view a website's source in the KDE text editor. This process saves
