

check is a normal feature in major email clients, MailSpring also hosts this feature, so you won't miss it. It automatically detects the language you use, you don't need to change your settings. MailSpring can sync your emails faster as well. Other common email features such as link tracking, quick reply templates, and read receipts are included.

Claws Mail

Claws Mail is a free email client which is a news and GTK+-based email client. It provides easy configuration and plenty of attributes. It runs on Solaris, Linux, BSD, Mac, and Windows. Its appearance and interface are developed in such
