

connection, availability and general checks of the infrastructure. This kind of monitoring allows the architect to build a hierarchy of monitoring systems for running local checks of the network region. It supports different types of logging including Syslog (on Linux and UNIX) and console logging.

## Cacti

Cacti is a complete network of graphing solutions that have been created for utilising the power of the RRDTool data of the storage and the graphic functions. It includes a fast poller and advanced graph facilitating templating multiple data methods of acquisition, and user management. All of this is covered in a perceptive method, and it is very simple to use the

The screenshot shows the Cacti web interface with a table of data sources. The table has columns for 'Data Source Name', 'Description', 'Host', 'Type', 'Template', 'Location', 'Status', 'Owner', and 'Report'. The data sources are listed in descending order of their last update time.

| Data Source Name | Description | Host          | Type | Template | Location | Status | Owner | Report |
|------------------|-------------|---------------|------|----------|----------|--------|-------|--------|
| Device 1000      | Device 1000 | 192.168.1.100 | SNMP | 1000     | 1000     | OK     | 1000  | 1000   |
| Device 1001      | Device 1001 | 192.168.1.101 | SNMP | 1001     | 1001     | OK     | 1001  | 1001   |
| Device 1002      | Device 1002 | 192.168.1.102 | SNMP | 1002     | 1002     | OK     | 1002  | 1002   |
| Device 1003      | Device 1003 | 192.168.1.103 | SNMP | 1003     | 1003     | OK     | 1003  | 1003   |
| Device 1004      | Device 1004 | 192.168.1.104 | SNMP | 1004     | 1004     | OK     | 1004  | 1004   |
| Device 1005      | Device 1005 | 192.168.1.105 | SNMP | 1005     | 1005     | OK     | 1005  | 1005   |
| Device 1006      | Device 1006 | 192.168.1.106 | SNMP | 1006     | 1006     | OK     | 1006  | 1006   |
| Device 1007      | Device 1007 | 192.168.1.107 | SNMP | 1007     | 1007     | OK     | 1007  | 1007   |
| Device 1008      | Device 1008 | 192.168.1.108 | SNMP | 1008     | 1008     | OK     | 1008  | 1008   |
| Device 1009      | Device 1009 | 192.168.1.109 | SNMP | 1009     | 1009     | OK     | 1009  | 1009   |
| Device 1010      | Device 1010 | 192.168.1.110 | SNMP | 1010     | 1010     | OK     | 1010  | 1010   |
| Device 1011      | Device 1011 | 192.168.1.111 | SNMP | 1011     | 1011     | OK     | 1011  | 1011   |
| Device 1012      | Device 1012 | 192.168.1.112 | SNMP | 1012     | 1012     | OK     | 1012  | 1012   |
| Device 1013      | Device 1013 | 192.168.1.113 | SNMP | 1013     | 1013     | OK     | 1013  | 1013   |
| Device 1014      | Device 1014 | 192.168.1.114 | SNMP | 1014     | 1014     | OK     | 1014  | 1014   |
| Device 1015      | Device 1015 | 192.168.1.115 | SNMP | 1015     | 1015     | OK     | 1015  | 1015   |
| Device 1016      | Device 1016 | 192.168.1.116 | SNMP | 1016     | 1016     | OK     | 1016  | 1016   |
| Device 1017      | Device 1017 | 192.168.1.117 | SNMP | 1017     | 1017     | OK     | 1017  | 1017   |
| Device 1018      | Device 1018 | 192.168.1.118 | SNMP | 1018     | 1018     | OK     | 1018  | 1018   |
| Device 1019      | Device 1019 | 192.168.1.119 | SNMP | 1019     | 1019     | OK     | 1019  | 1019   |
| Device 1020      | Device 1020 | 192.168.1.120 | SNMP | 1020     | 1020     | OK     | 1020  | 1020   |
