

AbiWord

AbiWord is an open-source platform which is similar to MS Word. The ultimate aim of the program is to work on the various zones. Downloading AbiWord is easy and there are various installation types available like minimal, typical, and full plus downloads. The user can choose the options either as functions or features. Adding or removing the installation functions is very easy.

Why you must get it:

Even though Microsoft Word is more popular, once AbiWord rolled out, it became apparent that is equally competitive in this space. With AbiWord, you can experience the basic and advanced versions of the app. You can connect with a free account or with the direction IP. It contains all features present in other word processors. The document backgrounds can be customised as well. The disadvantage is the lack of a help section for this software.

FocusWriter

If you plan to write down a poem, novel, or article and you do not want to use Word, you can try out FocusWriter which is available on all operating systems except a few. This avoids all kinds of digital distractions and allows you to complete work. It creates a wonderful environment for writing which removes all other options and distractions and just leaves you with a blank page. The selection of themes, however, is vast. So, you can choose a background in accordance with your subject or content theme.

Why you must get it:

FocusWriter is a wonderful word processor which comes with distraction-free options. It helps you in putting down all your ideas on a given page without too many distractions. By moving the cursor, you can get to your menu and choose options that you would like to use. You can set alarms and targets in this application and once the time gets elapsed, it will automatically highlight the fact and text. The files which are been created in the FocusWriter would be saved in TXT, RTF, DOCX, and ODT automatically. Once it gets saved in the preferred format, you can export it to the Word document. Novice writers find this application very useful.
