

predominantly a zombie apocalypse. There are also invasions of fungi, Lovecraftian monsters, triffids, and caves containing sewer rats and king rats.

Why you must get it:

In this game, each session takes place in a randomly generated (and literally endless) world for the ill-fated characters. The user gets to pick from the overwhelming list of the professions – roller derby player, security guard, beekeeper, and bionic sniper to name a few. Then one picks out some positive and negative traits, uses the game’s spectacular name generator, and the character will appear in any one of a number of interesting scenarios.

0 A.D.

O A.D. is an open-source, freeware game developed as a real-time strategy game by Wildfire games. It is a historical war and economy game. The events of O A.D. take place between 500 B.C. and 1 B.C. for the first part. The second part is around 1 A.D. to 500 A.D. This game is capable of running on popular operating systems like Linux, Windows, Mac OS X, and FreeBSD. It includes multiple units and buildings specific to each civilization as well as both land and naval units.

Why you must get it:

In O A.D. each civilization is unique in its background and strategy including units, structure and graphically made trees too. Some infantry and cavalry units can not only fight but also gather resources and use them for con-
