

Why you must get it:

Blender is a 3D open-source software. It has a path-tracer engine for real-time rendering which can also be sped up. The users can create 3D games, film animations, scripting, and other visual effect features. Additionally, it provides animation and rigging tools that are often used to create short films.

Pivot Animator

The Pivot Animator, also known as the Pivot Stick Figure Animator, is a free software application which will allow users to create a figure that looks like a stick and has spirit animations. The users can save their work
