

in an animated GIF format which can be used on the web pages, and in AVI format too. This open-source software provides the users with an easy-to-use interface that has quite a few features for them to use.

Why you must get it:

It is a free software application which is easy to install and simple to use. Users can modify the Pivot Stickfigure of the animator frame in any way needed. It has some basic animation controls for playback such as play, stop, and repeat. The user can create their own objects, backgrounds and characters. The work files created by users can be saved as a .PIV project file and can be exported into the animation of GIF. The Pivot Animator also lets the users change the homepage and the default search engine of the web browser as well as install the extra toolbars making their workflow better

TupiTube

The TupiTube or Tupi is a 2D animation software that focuses on teenagers, amateurs, and children. This project has been developed and maintained by startup called MaeFloresta Colombian. It is covered under the terms of GNU general public license version 2. It is an open-source software, thus is free of cost.

Why you must get it:

The most important goal is to provide an easy user experience. It has various features like support for basic tools for vector illustrations which include
