

3. Verify Your Domain

You will need to verify ownership of your domain with Google after setting up your admin panel. Adding a TXT record or CNAME to your DNS zone file is the recommended method for verifying your domain.

Top features for streamlining your business.

- Helpful tools, thoughtfully connected
- Custom professional email @yourcompany
Build customer trust with professional email addresses at your domain. From team members like priya@yourcompany to group lists like sales@yourcompany.
- More storage for your team
- Works with the way that you work

4. Add an Email User

The Google Workspace Admin panel or Account Center can be used to add new email users to your Google Workspace account.

Setting up an account

Google Workspace comes with different options. You can select the option as per your requirement. Listed below are the different available options:

1. Individual edition: If you do not own any domain and have a personal Gmail address, you can sign up to Google workspace using your existing gmail account. This category helps small business owners to be more productive and professional in doing business. It is designed for one-person businesses that use personal account domains like gmail.com.
2. Business and Enterprise editions: If you have multiple users and own your own domain, you can sign up for the Business or Enterprise edition. Under this option, there are different categories, and you can choose one based on business size.
