

Google Calendar

Save the date

Time-management and scheduling calendar services by Google are available through Google Calendar. Its beta release was on 13th April, 2006, while it was released to the masses in July 2009. Google Calendar is available on both web and as a mobile app for the Android and iOS platforms.

Users can edit and create events in Google Calendar. You can set up reminders for events and choose the type and time of reminders. Additionally, users can add locations and invite others to events. Users can toggle the visibility of unique calendars, such as Birthdays, which retrieves dates of birthdays from Google contacts and displays birthday cards yearly, and Holidays, which dis-
