

may exceed the marker in size. Go to Object > Graph > Design after selecting the design.

Click New Design in the dialogue window.

To give the design a name, click Rename. To close both dialogue windows, click OK.

Markers on the graph should all be selected, including the one in the legend. Go to

Select Marker from Object > Graph. Click OK after selecting the marker. Using the Group Selection Tool, finish formatting the graph's components. You may easily move anything to the pasteboard that you don't want to display on the graph, such as the legend.

Adding pictures and symbols to your graphs

Images can be added to columns and markers in graph designs.
