

- There is more flexible parsing and compatibility with the improved parsing rules
- There are many new elements like nav, section, video, time, progress, meter, canvas and side
- There are new input attributes such as email, dates and time, and URL
- There are new attributes such as charset, async and ping
- There are new APIs that help with offline caching, along with drag-and-drop support
- You can use Silverlight or Flash for vector graphics
- The language now supports MathML to display mathematical notations
- The JS Web Worker API allows JavaScript to run in the background
- You can apply global attributes such as tabindex, repeat and id to all elements

Basic Code & Tags

Try writing this basic code and using tags to practise!

My first heading

- `<html>`
- `<body>`
- `<h1>My First Heading</h1>`
- `<p>My first paragraph.</p>`
- `</body> </html>`

HTML headings

- `<!DOCTYPE html>`
- `<html>`
- `<body>`
- `<h1>This is heading 1</h1>`
- `<h2>This is heading 2</h2>`
- `<h3>This is heading 3</h3>`
- `<h4>This is heading 4</h4>`
- `<h5>This is heading 5</h5>`
- `<h6>This is heading 6</h6>`
- `</body>`
- `</html>`
