

Basic Code

Here's some basic code for you to practise:

Hello People

```
// C# program to print Hello People
using System;

namespace HelloGeeksApp
{
    class HelloGeeks
    {
        // Main function
        static void Main(string[] args)
        {
            // Printing Hello People
            Console.WriteLine("Hello People");

            Console.ReadKey();
        }
    }
}
```

Single line comment before code

```
using System;

namespace HelloWorld
{
    class Program
    {
        static void Main(string[] args)
        {
            // This is a comment
            Console.WriteLine("Hello World!");
        }
    }
}
```

Create a string variable

```
using System;
```
