

```
namespace MyApplication
{
    class Program
    {
        static void Main(string[] args)
        {
            string name = "John";
            Console.WriteLine(name);
        }
    }
}
```

Create an integer variable

using System;

```
namespace MyApplication
{
    class Program
    {
        static void Main(string[] args)
        {
            int myNum = 15;
            Console.WriteLine(myNum);
        }
    }
}
```

Creating a variable without assigning value

using System;

```
namespace MyApplication
{
    class Program
    {
        static void Main(string[] args)
        {
            int myNum;
            myNum = 15;
            Console.WriteLine(myNum);
        }
    }
}
```
