

```

    }
}
}

```

Declare many variables

```
using System;
```

```

namespace MyApplication
{
    class Program
    {
        static void Main(string[] args)
        {
            int x = 5, y = 6, z = 50;
            Console.WriteLine(x + y + z);
        }
    }
}

```

Different data types

```
using System;
```

```

namespace MyApplication
{
    class Program
    {
        static void Main(string[] args)
        {
            int myNum = 5;           // integer (whole
number)
            double myDoubleNum = 5.99D; // floating point number
            char myLetter = 'D';      // character
            bool myBool = true;       // boolean
            string myText = "Hello";  // string
            Console.WriteLine(myNum);
            Console.WriteLine(myDoubleNum);
            Console.WriteLine(myLetter);
            Console.WriteLine(myBool);
            Console.WriteLine(myText);
        }
    }
}

```
