

3. OpenArt

OpenArt is an online platform that features AI-generated images. It offers users the ability to browse and search for art pieces and prompts from various AI models such as DALL-E 2, Midjourney, and Stable Diffusion. Additionally, it enables users to create their own images by providing text prompts. The company was established in 2022 and has its headquarters in San Francisco, California.

The OpenArt Workspace is a product that utilizes generative Artificial Intelligence technology to create images that exist only in the imagination. It learns from real-life photographs of a subject and trains an AI model to generate similar photos of that subject. The subject could be anything from a person or animal to an object or even a particular art style.

4. NightCafe Creator

The NightCafe Creator app is an AI Art Generator with various methods of generating art. It employs neural style transfer to transform your photo into a stunning masterpiece. In addition, using text-to-image AI, you can produce artwork from a text prompt.

You retain ownership of the art you create, and you have the freedom to use it however you like, subject to your jurisdiction's copyright laws and provided that you own or have obtained permission to use any input images. You can access the NightCafe Creator AI Art Generator app for free on the web and on
