

But that's not all - this photo editor can also restore damaged old photos with just one click. Scratches, stains, and other imperfections can be eliminated to bring old photos back to life. Black and white photos can be transformed into vibrant and realistic images automatically. And if you want to enhance portraits, this AI tool can help bring out the best in each face.

3. Imagen

Imagen's cutting-edge technology analyzes your previous photo edits to create a Personal AI Profile just for you. This profile can be applied to your Lightroom Classic catalogue in less than half a second per photo. With the AI Profile, you can rest assured that your white balance, exposure, colour correction, and other adjustments will be expertly handled.

At Imagen, the team believes that you should always be in control of your edits. That's why you can review the results in Lightroom and make tweaks as needed. The AI continues to learn and evolve with you, so you can always trust that your photos will be edited to your liking.

The real-time AI analyses each photo you want to edit, adjusting different Lightroom parameters based on your preferred editing style and the needs of the photo itself. You'll be able to review the final edits and make further tweaks if desired. With Imagen, your editing workflow can be reduced by up to 96%, leaving you with more time to focus on what you love.
