

Why this?

AI AI what you say?
I'll make content for you all day

So, we recently published booklet that covered everything you need to know about Stable Diffusion, and while it saw a tremendously positive response, our team was little unhappy. Why? Well, the reality is that not everyone has the hardware to support Stable Diffusion, which means that not everyone can monetise or benefit from it. What then?

Well, fortunately, there are plenty of AI apps across industries that have been designed to simplify workflow, augment creativity, and make your life much easier. This is exactly what this booklet covers.

AI and the world around you

The year 2022 (and even 2023 now) has proven the revolutionary capabilities
