

3. Integrate with your CRM

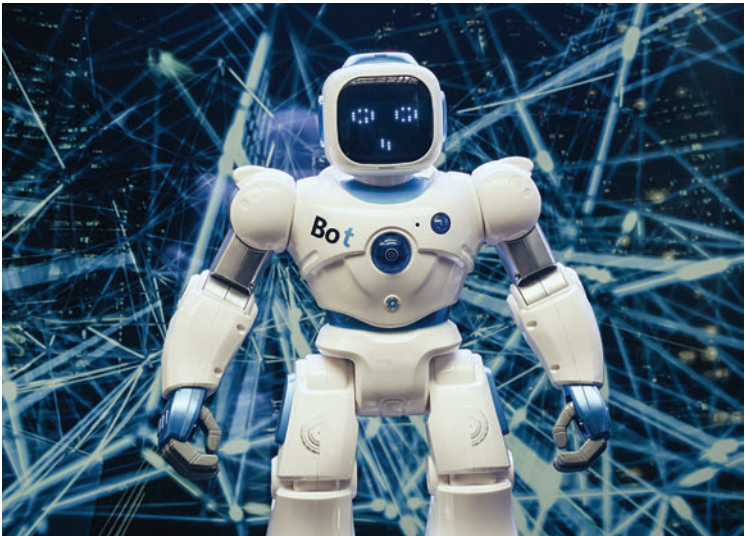

Set up notifications from your CRM to tell Maverick when you want to send a personalized video. Maverick can work with a variety of CRMs, including Klaviyo, Omnisend, ActiveCampaign, and Hubspot.

4. Maverick sets everything up

As a white glove service, Maverick sets everything up for you. They'll process your videos, create branded landing pages, and set up email delivery from your domain.

5. Launch your campaigns!

Once your videos are processed, Maverick sends you samples to review. After approval, they turn on your campaigns and the personalized videos start going out!

9. Quickchat

Quickchat is an advanced AI assistant that emulates human-like responses to provide prompt and accurate answers to customer queries. Its implementation on any website is hassle-free, requiring no technical knowledge or time-consuming setup. You can easily connect your software to the API for
