

2. Create an Intelligent Glossary. Choose the concepts that define your product best. Take charge of the critical terms that matter to your customers and your business.
3. Publish the Puzzle Widget. Copy and paste the code snippet on your website, and the Puzzle Widget automatically updates whenever you add new concepts.

11. Cleanup

Cleanup.picture is an advanced AI-based editing tool that surpasses traditional clone stamp tools like Adobe Photoshop fix. Unlike these tools, the AI can accurately guess the background behind unwanted objects, text, or people in just a few clicks, without the need for a reference background.

Inpainting, a retouch technology that removes unwanted objects from photos, can also be used to remove unwanted people. While earlier versions of Inpainting required the use of Clone tools, AI-powered Inpainting delivers significantly better results.

With Cleanup.pictures, you can import and edit pictures of any size, with a free version limiting export to 720px. Removing people from a photo can be done in seconds, without the need for complex software like Adobe Photoshop. Cleanup.pictures provides professional-level results with just a few clicks,
