- Learn the best ways to use your various logo file types
- Establish a consistent and memorable brand identity across all mediums.

14. Synthesia

Synthesia’s AI video creation platform is used by thousands of companies worldwide to create videos in over 120 languages, resulting in up to 80% savings in time and budget. Unlike traditional video creation processes, AI video creation is fast, cost-efficient, and easy to use, requiring no prior knowledge of video editing.

With Synthesia, you can create professional-looking videos with ease, without the need for on-camera actors. Synthesia AI avatars are digital twins of real actors, and you can choose from over 100 diverse AI avatars, including exclusive options for your brand, or even create your own custom avatar.
