

nature and numerous benefits. Consequently, it became the most widely used mobile platform, leading to an increased demand for skilled Android developers. Today, the demand for Android apps continues to grow, resulting in more job opportunities for developers. In India alone, there are currently around 25,000 open positions for Android application development, and the field is expected to expand significantly in the future.

So, how much can you earn?

The location of an Android developer in India can significantly impact their earnings as it affects the cost of living and therefore, salary determination. This is why Android developers in larger cities generally earn more than those in rural areas. The following table shows the salary variation for Android developers across different cities in India, with all figures based on the country's overall average for the profession.

City-wise Salary:

- Bangalore: Rs. 7,00,000 per year
- Hyderabad: Rs. 5,26,761 per year
- Mumbai: Rs. 4,98,186 per year
- Ahmedabad: Rs. 3,00,014 per year
- Chennai: Rs. 4,78,874 per year
- New Delhi: Rs. 6,14,025 per year

On average, an Android developer in India earns around Rs. 4,00,000 per year. Freelance Android app developers in India can earn between Rs. 10,000 to Rs. 3,000,000. Simple app development tasks can be charged at Rs. 2,000 to Rs. 3,000, while skilled developers may charge between Rs. 14,000 to Rs. 70,000 per app depending on the project and client.
