

App mania!

All things Android, all things
development, in one place...

Android as a mobile OS right now is bigger than ever. Organisations left, right, and centre are developing apps of their own to aid in their reach to their people. Be it entertainment, dating, gaming, or whatever you can think of; there is probably an APK somewhere that is available for you to download. The ripple effects of this have been reflected in the increase in demand for Android app developers. The last time there was a similar surge, we published a FastTrack covering the Android Studio.

Now, what you must be thinking is – Why publish another one then? Well, things change. Between 2015 and now, over half a decade has passed. And, if you are in tune with the happenings in the world of technology, be it hardware or software, you'd know that every second, things change. Be it for the better or, the worse, they do. Change is a constant.

So when we set out to write this booklet, we did not try and futureproof the contents. You will see an odd prediction here and there, but mostly, things
