

Instruction	Type	Prompt Completion
Simple instructions	Write an introduction for a weekly newsletter.	Welcome to our weekly newsletter. This week we have a special focus on productivity. We'll be sharing tips and tricks on how to be productive in all areas of your life. We hope you enjoy and please share with your friends!
Complex instructions	Write an introduction for a weekly newsletter addressed to my company, HappySmiles. It should mention the all-hands meeting held last week and express gratitude to the team for their hard work over the past few months.	Welcome to HappySmiles weekly newsletter! We had a great all-hands meeting last week, and I want to express my gratitude to the team for their hard work over the past few months. We're looking forward to a bright future and I'm confident that with our team's dedication and commitment, we will achieve great things. Thank you for being a part of our team, and I look forward to working with you all in the coming weeks and months. Sincerely, [Your name].
Complex Instructions	Write an introduction for a weekly newsletter with the following details: - Company named HappySmiles - Cheerful greeting - Appreciation to the team for their hard work over a few challenging months - Optimistic outlook for the upcoming quarter - Signed by the Senior Leadership Team	Hello HappySmiles team! We want to take a moment to express our gratitude for all your hard work over the past few months. It has been a challenging time, but you have all pulled together and done an amazing job. We are truly proud of you all. Looking ahead to the next quarter, we are feeling optimistic and confident that we will achieve great things together. Thank you once again for your dedication and commitment to the team. Best regards, The Senior Leadership Team.

fies. It is commonly used in combination with instructions. For instance, in the case of language translation, the English text would be considered primary content, whereas "Translate to French:" would be the instruction.

For example:

Prompt: Can you please tell me how to get to the museum?

Translate to French:

Output:

Pouvez-vous s'il vous plaît me dire comment aller au musée?

Primary content can be considerably lengthier as well. As demonstrated in the following example, the primary content is the introduction section of the Wikipedia page on time complexity, which is roughly 300 words in length. For ease of presentation, the content has been shortened in our table.

3. One Shot and Few Shot Learning

To achieve successful prompts, the practice of "one-shot" or "few-shot" learning is often used. This involves providing one or more examples of the desired behaviour of the model, usually in the form of input and output pairs. These examples condition the model to respond as intended for only the current inference, without permanently altering the model. If prompts are used

without examples, it is referred to as "zero-shot" learning. In the Chat Completion API, few-shot learning examples are typically added to the messages array as user/assistant interactions after the initial system message.

4. Cues

Cues serve as a trigger for the model's output, aiding in directing the model to the desired output. Typically, cues are used as a prefix that the model can build upon. In the examples provided, cues are utilized to guide the story towards the inclusion of key elements. While cues are usually used with instructions, this is not always the case. In the following examples, the model is used to summarize a lengthy announcement email, with one cue being used to focus the output of the model, and the other suggesting a specific output format (bullet points).

In the context of the Chat Completion API, instructions are presented as the system message, while few-shot examples are provided in the form of an example user/assistant interactions to prime the model.

5. Supporting Content

Supporting content is supplementary information that the model can use to influence the output in some way. Unlike pri-
