

Navigating the Notion interface

Now it's time to get familiar with the surroundings

Acclimating to the interface of Notion is your next step into becoming proficient with this versatile tool. In this chapter, we delve into the nuances of navigating through Notion, understanding its sidebar, top menu, workspace, and how to effectively organize and manage your data through pages and sub-pages. Moreover, we'll uncover how to enhance your productivity using bookmarks, shortcuts, and multitasking features like multiple windows and tabs.

Navigation basics: Sidebar, Top Menu, and Workspace:

The backbone of Notion's user interface is its Sidebar, Top Menu, and Workspace area. Here's a breakdown:

Sidebar:

- The Sidebar is your navigation hub. It houses your Workspaces, pages, favorites, and the 'Create New' button to add new pages or import data.
- To toggle the sidebar, click on the three horizontal lines (hamburger icon) at the top-left corner.

Top Menu:

The Top Menu appears at the top of your workspace, providing quick access to functions like search, share, and settings of the current page.

Workspace:

The Workspace is the main area where you create, view,
