

Online Safety for Children & Teens

Empowering young netizens with safety and confidence
for the digital age

As the digital world continues to expand, it becomes increasingly intertwined with the lives of children and teens. The internet offers vast resources for learning, entertainment, and socialisation. However, it also presents a unique set of risks that young users may not be fully prepared to navigate. This chapter focuses on equipping parents, guardians, and educators with the necessary tools and knowledge to guide the younger generation through the digital landscape safely. From understanding online risks to implementing protective measures and fostering open commu-

nication, this chapter lays the groundwork for a comprehensive approach to online safety for children and teens.

Educating the Younger Generation on Online Risks

The first step in protecting young internet users is to educate them about the potential dangers they may encounter online. These risks can range from exposure to inappropriate content and cyberbullying to interactions with online predators. It's essential to introduce these topics in a way that is age-
