

makes it suitable for a variety of uses, from project planning to daily to-do lists.

Todoist

Todoist is a powerful task management application that helps users organise their work and personal life. With its clean, intuitive interface, users can easily create tasks, set deadlines, and label and prioritise items for better task management. Todoist also allows users to set recurring tasks and reminders, making it ideal for managing daily activities as well as long-term projects. The app integrates with many third-party applications, enhancing functionality and connectivity. Its simplicity and effectiveness make Todoist a favourite among productivity enthusiasts.

Focus Booster

Focus Booster uses the Pomodoro Technique to help users maintain focus and enhance productivity. The app is designed to break work into manageable intervals, typically 25 minutes of focused work followed by a short break. This method keeps the mind fresh and motivation high. Focus Booster also provides insightful analytics that track your work sessions, helping you to identify productivity patterns and optimise your schedule. Ideal for freelancers, students, and professionals, Focus Booster is a great tool for anyone looking to improve their time management skills and get more done in less time.

Study Bunny

Study Bunny is a motivational and organisational app designed to

IMPROVE COGNITIVE EFFICIENCY

Lumosity

This app takes a playful approach to brain training with games designed by neuroscientists to improve cognitive abilities like memory, attention, and problem-solving. Users engage with daily exercises that adapt to their unique performance levels, ensuring challenging yet achievable tasks that sharpen the mind and promote mental agility. It's ideal for those looking to boost their brain function in a fun and interactive way.

RescueTime

Offering insightful analytics on how you spend your digital life, Rescue Time helps you understand your daily habits and make smarter decisions about time management. It runs quietly in the background, tracking the time you spend on apps and websites, then provides detailed reports and productivity scores. This app is perfect for anyone looking to reclaim their time and focus on what truly matters.

f.lux

f.lux adjusts your computer's display to the time of day, not just brightness but tone, reducing blue light during the evening to help reduce eye strain and improve sleep quality. This subtle adjustment can make a dramatic difference in your overall comfort and sleep patterns, making it essential for those who spend long hours in front of screens.

Kanban Flow

Kanban Flow boosts productivity by combining the simplicity of the Kanban board with the power of time tracking. Users can visualise their work, limit work-in-progress, and track time on tasks directly on the board. It includes a Pomodoro timer to encourage regular breaks, making it a versatile tool for both individuals and teams aiming to streamline workflows and increase efficiency.

keep students engaged with their studies through a fun, interactive interface. Users can personalise a bunny character that acts as a study buddy, encouraging them to stay focused and complete tasks. The app features a timer to monitor study sessions and break times, a to-do list for task management, and a reward system where users earn coins to buy items for their bunny. Study Bunny combines productivity with gamification, making study time both enjoyable and effective, especially for younger users.
