

Managing Time and Distractions

Master your digital efficiency with tools to minimise distractions and optimise time

In a world saturated with digital information and constant connectivity, managing your time effectively and minimising distractions has become essential for maintaining productivity and well-being. This chapter explores a range of apps designed to help you gain control over your screen time and reduce interruptions from digital devices, allowing you to focus more on what truly matters in your life.

Space

Space offers a customised approach to managing your smartphone usage by analysing your habits and providing actionable

feedback. Through detailed insights and visual representations, it helps you understand how often and why you reach for your phone, such as during meals or while working. For example, if you tend to check your phone frequently
