Online Courses and Tutorials

The internet is a treasure trove of educational resources for developers. Platforms like Coursera, Udemy, edX, and Pluralsight offer comprehensive courses on various programming languages and technologies. Here are some recommendations:

1. Coursera:

- **Python for Everybody:** A beginner-friendly

course by the University of Michigan that covers Python fundamentals.

- **Algorithms:** A series by Princeton University that dives deep into algorithms and data structures.

2. Udemy:

- **The Complete JavaScript Course 2024:** From Zero to Expert! A comprehensive course covering JavaScript from basics to advanced concepts.
- **Learn C++ Programming - Beginner to Advance - Deep Dive in C++:** A detailed course on C++ programming.

3. edX:

- **Introduction to Computer Science using Python:** Offered by MIT, this course introduces the basics of computer science and Python programming.
