

18 > Understand Your Audience

giving the audience insight into the innovation and creativity driving the company.

BTS content also helps build transparency, as it shows that you have nothing to hide. It can be particularly effective in industries where trust is paramount, such as food, healthcare, or finance. By lifting the curtain and showing your audience how things work behind the scenes, you can build a stronger, more trusting relationship with them.

User-Generated Content (UGC)

User-generated content (UGC) is any form of content—such as photos, videos, reviews, or social media posts—that is created and shared by your audience. UGC is incredibly valuable because it serves as social proof, showing that real people are using and enjoying your products or services.

UGC is a powerful tool for authenticity because it comes directly from your customers. When potential customers see UGC, they're more likely to trust it than traditional advertising because it's perceived as unbiased and genuine. UGC also helps build community by encouraging participation and interaction among your audience.

To encourage UGC, consider creating campaigns or challenges that invite your audience to share their experiences with your brand. For example, a fitness brand might ask customers to share photos or videos of their workouts using a specific hashtag. You can then showcase the best UGC on your website, social media, or in marketing materials, giving your audience a sense of ownership and involvement with your brand.

Encouraging Participation

Encouraging participation is key to harnessing the power of UGC and creating a sense of community around your brand. The more involved your audience feels, the more likely they are to create and share content.

Showcasing UGC

Once you've collected UGC, it's important to showcase it in a way that amplifies its impact. Feature UGC prominently on your website, social media channels, and in marketing campaigns. Highlight the individuals who created the content, and consider offering incentives or rewards for the best submissions. By showcasing UGC, you not only validate the creators but also encourage others to participate.

Legal Considerations

While UGC is a valuable asset, it's important to be aware of the legal considerations involved in using it. Always obtain permission from the creator before using their content, and provide proper attribution. Make sure to familiarize yourself with the terms and conditions of the platforms you're using, as well as any relevant copyright laws. It's also a good idea to have a clear UGC policy in place that

outlines how you will use the content and what rights the creators retain.

Tools and Resources for Human-Focused Content

Creating human-focused content requires the right tools and resources to help you craft compelling stories, encourage participation, and analyze performance. Below are some key tools that can support your efforts.

Storytelling Tools

Storybird and Plotagon are two storytelling tools that can help you create engaging narratives. Storybird allows you to create visual stories using a library of artwork, making it ideal for creating illustrated content. Plotagon, on the other hand, enables you to create animated stories with customizable characters and settings. Both tools are user-friendly and can be used to create content that resonates with your audience.

UGC Platforms

TINT and Yotpo are platforms designed to help you manage and showcase UGC. TINT allows you to aggregate and curate UGC from social media, while Yotpo specializes in collecting and displaying customer reviews and photos. These platforms can help you build trust and authenticity by showcasing real customer experiences.

Analytics Tools

Understanding the effectiveness of your content requires robust analytics tools. Google Analytics is a comprehensive tool that tracks website traffic, user behavior, and conversion rates, providing valuable insights into how your audience interacts with your content. Hotjar offers additional insights by recording user sessions and collecting feedback, allowing you to understand the user experience in more detail. Both tools are essential for optimizing your content strategy and ensuring that it meets your audience's needs.
