

How IE7 Protects You

Internet Explorer 7 takes online protection seriously in the upcoming Windows Vista

Internet Explorer 6

2. If malicious code manages to bypass the protection built into IE6 and enter your system, it, too, gets to run with the same privileges. It has access to everything you have access to, and can wreak havoc

1. When you surf the Internet as the Administrator of your PC, Internet Explorer 6 runs with the same privileges you have—including the ones that can cause damage. Now, as you know, there's a lot of malicious code out there

3. After the damage has been done, you'll just be left feeling mighty miffed—and all you wanted to do was surf the Net!
