

6 More filing, but more carefully this time—make sure you don't file too close to the screw hole

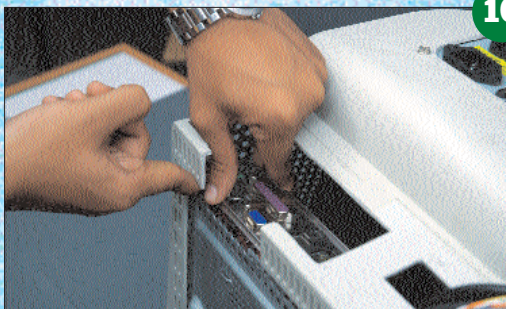

7 Making sure the power supply is firmly held in place. If it falls on the motherboard, that's the end of that!

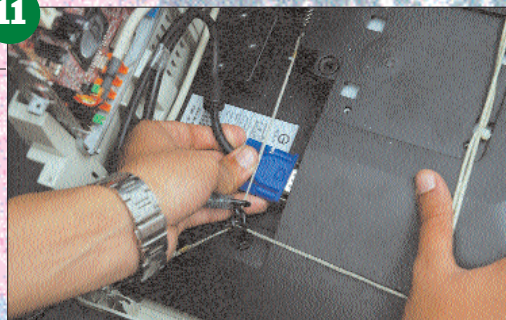

8 Using the premade holes in the CRT to fix the hard drive on the inside

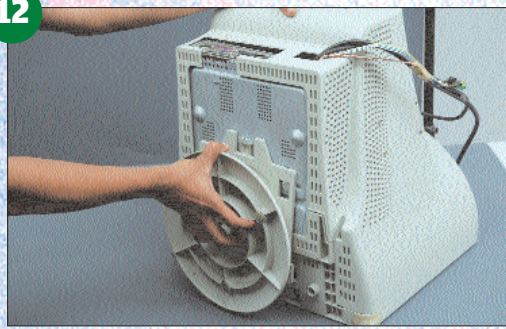

9 Making sure that everything will connect to the back of the motherboard

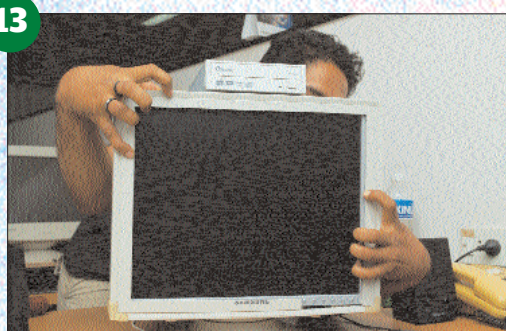

10 Using the back plate on the PC cabinet to make the back of our mod prettier

11 Connect everything up—most importantly, remember to connect all LCD connections before you close the CRT case

12 The stand not only props our whole mod up, it also holds the motherboard in place

13 That's Pradip, explaining how he'll go about turning what we thought was an almost finished mod, into a monster

14 That used to be Amrut's hand, but now it belongs to monster PC

15 Start making a mess and in no time there's a crowd—using the mould to make a hand
