

PC-BSD

PC-BSD

PC-BSD has been designed with the "casual" computer user in mind. Installing the system is simply a matter of a few clicks and a few minutes for the installation process to finish. Hardware such as video, sound, network and other devices will be auto-detected and available at the first system startup. NOTE: During our tests, we discovered that PC-BSD's hardware support can be shaky, so it might not install on all PCs
