

HP LaserJet 3390 All-in-One and 3392 All-in-One Heavyweight performers

These two are for heavy workloads, and are therefore more expensive than most of the other MFDs we've tested here. They are almost identical, with just a few differences.

Build quality is very good, and the 3390 and the 3392 are as rugged as you'd want them to be for regular office work. The footprint is 49.5 x 40 cm; these are the heaviest MFDs of the lot, with the 3390 and 3392 weighing 17.8 and 21.8 kg respectively. They're certainly not meant to be moved around once set up!

While the 3390 has an input tray that holds 250 sheets, the 3392 can accommodate 500, thanks to its two trays. You can opt to augment the 3390's capacity to 500 by adding an optional tray. Both MFDs have an output tray capacity of 125 sheets. The ADF has a maximum capacity of 50 pages.

The control panel features alphanumeric buttons and menu and cancel controls. There are three discrete sections for fax, scan, and copy controls. Sixteen one-touch dialling buttons are also present allowing you to speed dial stored numbers.

The supported print resolution is 1200 x 1200 dpi—the highest we have

in this test; these two MFDs also support duplex printing. The 3390 has a 64 MB input buffer, while the 3392 has 128 MB. And if this weren't enough, there is the provision to add a 100-pin DIMM module to get a maximum input buffer of 192 MB! The 3392 also features a convenient electric stapler so you can quickly staple together as many as 20 sheets.

We saw high warm-up times in these cases: around 44 seconds.

Print quality is about average in Draft mode, but very good in the best mode. We should also mention that these printers produce very clean prints—no carbon splattered anywhere.

The A4-size flatbed scanner supports 1200 x 1200 dpi (optical) and an interpolated resolution of up to 19,200 dpi. The scanner supports both the WIA and the TWAIN interfaces. We saw average speeds at regular resolutions, but it was faster as the resolution and colour depth was raised. Captured colour quality is also not bad, but there were a few too many errors in our OCR test.

HP LaserJet 3390 All-in-One

HP LaserJet 3392 All-in-One

It all adds up; Foxconn motherboards offer enhanced reliability, usability and connectivity. With a 100% SOLID Capacitor design and an engineering process that improves durability, the P35A-S is reliable even under heavy loading. **No more Ctrl+Alt+Delete.**

Reliability + Durability =

P35A-S

- Supports Intel® Core™2 Quad, Core™2 Extreme, Core™2 Duo Processors with 1333/1066/800MHz FSB
- ATI CrossFire™ & Foxconn Multi-Graphics support
- 100% SOLID Capacitor design with Foxconn Sustainable Engineering
- Intel® Matrix Storage Technology and Rapid Recover Technology
- Gigabit LAN, 7.1 Channel HD Audio
- 6* SATAII, eSATAII, 2* IEEE1394, 10* USB2.0

G9657MA-8EKRS2H

- Intel® Core™2 Quad, Core™2 Extreme, Core™2 Duo processors with 1066/800/533MHz FSB, LGA 775
- Integrated Intel® GMA X3000 graphics with Intel® Clear Video Technology™
- FoxOne™ technology
- Dual Channel DDR2 800/667/533 memory, max. 8GB
- 1* PCIe x16, 1* PCIe x1, 2* PCI
- 4* SATAII, 1* eSATAII, RAID, IEEE1394a, 7.1 HD Audio and GbE LAN
- Supports Vista Premium
