

❑ Age of the site: It is easier and quicker to rank an older Web site with more unique content pages compared to a brand new Web site. A call therefore needs to be taken for the marketing strategy keeping the age of the site in mind.

A search for "Search engine optimisation India" will bring up some of the top companies that provide that service. SEO is not cheap; it can take you anywhere between Rs 30 to 40 thousand to SEO your Web site for six months. Going with a PPC campaign depends on the number of keywords you target, and the duration of the campaign.

“It is better to optimise a site using SEO, which will ensure a steady flow of traffic over a longer period of time, rather than go in for PPC”

Vishal Sampat
CEO, Convonix Inc.

Corporate Blogging

According to Jupiter Research, a leading authority on the impact of the Internet and emerging consumer technologies on business, 35 per cent of large companies plan to start corporate blogs this year. The idea behind corporate blogging is to form a direct and lasting impression on your customer, and to build trust, which translates to more business.

A corporate blog should aim to highlight the issues, concerns, successes, and future strategies of the company, and can be used as an effective tool to target the right audience. It can also be used to announce new services or products. Once your blog is ready, you can advertise its presence by adding it to online wikis—these are freely modifiable, so you can include your blog. Sites like NewPR (www.thenewpr.com), BlogFlux (<http://dir.blogflux.com/tag/corporate>), and Bloggeries (www.bloggeries.com/Business/Corporate) allow you to index your blog in directories related to your field. The blog can then be used to quickly gather feedback about new and existing products and issues.

Creating a blog is relatively inexpensive. We'd suggest WordPress (<http://wordpress.org>)—it's free, and gives you detailed instructions on how to set up a blog. All you really have to do is host it on your Web space. However, maintaining a blog—as in keeping it up-to-date—is time-consuming. Remember a blog doesn't help much if your business is not directed towards the end user.

A negative with corporate blogging is that there could be negative comments and feedback on the blog. Still, companies like WATConsult (www.WATConsult.com), RelevantNoise (www.relevantnoise.com), and Cymfony (www.cymfony.com) specialise in "Blog Monitoring and Crisis Management," and for about Rs 8,000, will advise you on the right course of action if and when things go sour.

Specialize in Networking & Security

@
Best IT Infrastructure Labs in India

★ Lab: 80 Cisco Routers (3600, 2600, 2500, 1700, 800 Series), 17 Catalyst Switches (5000, 3750, 3550, 5000 2950, 2900, 1900 Series), ISDN (Frame Relay / X.25 WAN setup, Ethernet / Wireless / Token Ring LAN Setup, Cisco PIX/ASA, HP Hubs/Switches, Netgear, HP, IBM, VPN Appliances, Cisco 3000 VPN Concentrator, Cisco 4200 IDS, Sensor Switches, Webserver and Firewall)
