the aggressive side, though. The Samsung S850; what was most impressive about the S850's performance was the crisp and bright photos while zooming in the studio light setup. Almost all the other cameras gave us trouble while zooming to the limit. The images almost always ended up rather dark.

The Canon PowerShot A450 and A460 suffered mostly from their inferior resolutions, though the colour representation here was pretty good. The Kodak cameras in general gave

us over-bright colours—different from the more natural, neutral colours of the Canons.

Value

The best overall performance for this category comes from the Samsung S850. The price tag is Rs 14,490, though—pretty high.

The Canon A450 is a steal of a buy: the 5 megapixels might be a bit of a let-down for some, but where it loses out on features, it makes up with its impressive pricing of just Rs
